

Technology Vendor Complexity Scorecard

An interactive self-assessment that helps you quickly evaluate whether vendor sprawl may be creating unnecessary operational overhead

Count Your Technology Vendors

Check each provider your business currently manages:

 Internet Provider ☐	 Phone System Provider ☐	 Managed IT Provider ☐
 Cybersecurity Provider ☐	 Cloud Provider ☐	 Security Cameras ☐
 Access Control ☐	 Alarm Monitoring ☐	 Cellular Provider ☐
 Copier / Print Vendor ☐	 Microsoft Licensing ☐	 Backup / Disaster Recovery ☐

Your Results

1-4 Vendors

Your environment is relatively streamlined, but periodic reviews can ensure it stays that way.

5-8 Vendors

You may be spending more time coordinating technology than you realize. It may be worth evaluating opportunities to simplify management.

9+ Vendors

Your organization is likely experiencing significant administrative overhead, fragmented accountability, and unnecessary complexity. A technology consolidation strategy could reduce operational burden and improve responsiveness.

BestLine Solutions Perspective

Vendor consolidation isn't about forcing every service under one contract. It's about creating one trusted relationship that provides visibility, accountability, and coordination across your entire technology environment.
